Step by Step UNIMINI

1. Check the ground conditions for stability and drainage. If necessary, level the ground and install a drainage system. The drainage system should be installed before the safety surfacing is laid.

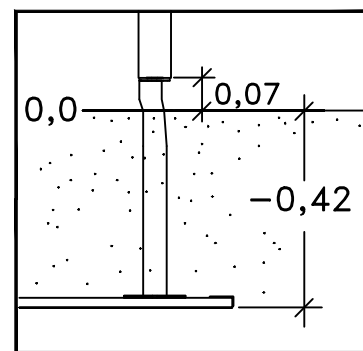

2. Check the dimensions of the playground equipment. The dimensions should be checked before the equipment is installed. The dimensions should be checked against the technical drawings.

3. Check the safety surfacing. The safety surfacing should be installed according to the technical drawings. The safety surfacing should be checked for stability and drainage.

4. Check the safety surfacing. The safety surfacing should be installed according to the technical drawings. The safety surfacing should be checked for stability and drainage.

5. Check the safety surfacing. The safety surfacing should be installed according to the technical drawings. The safety surfacing should be checked for stability and drainage.

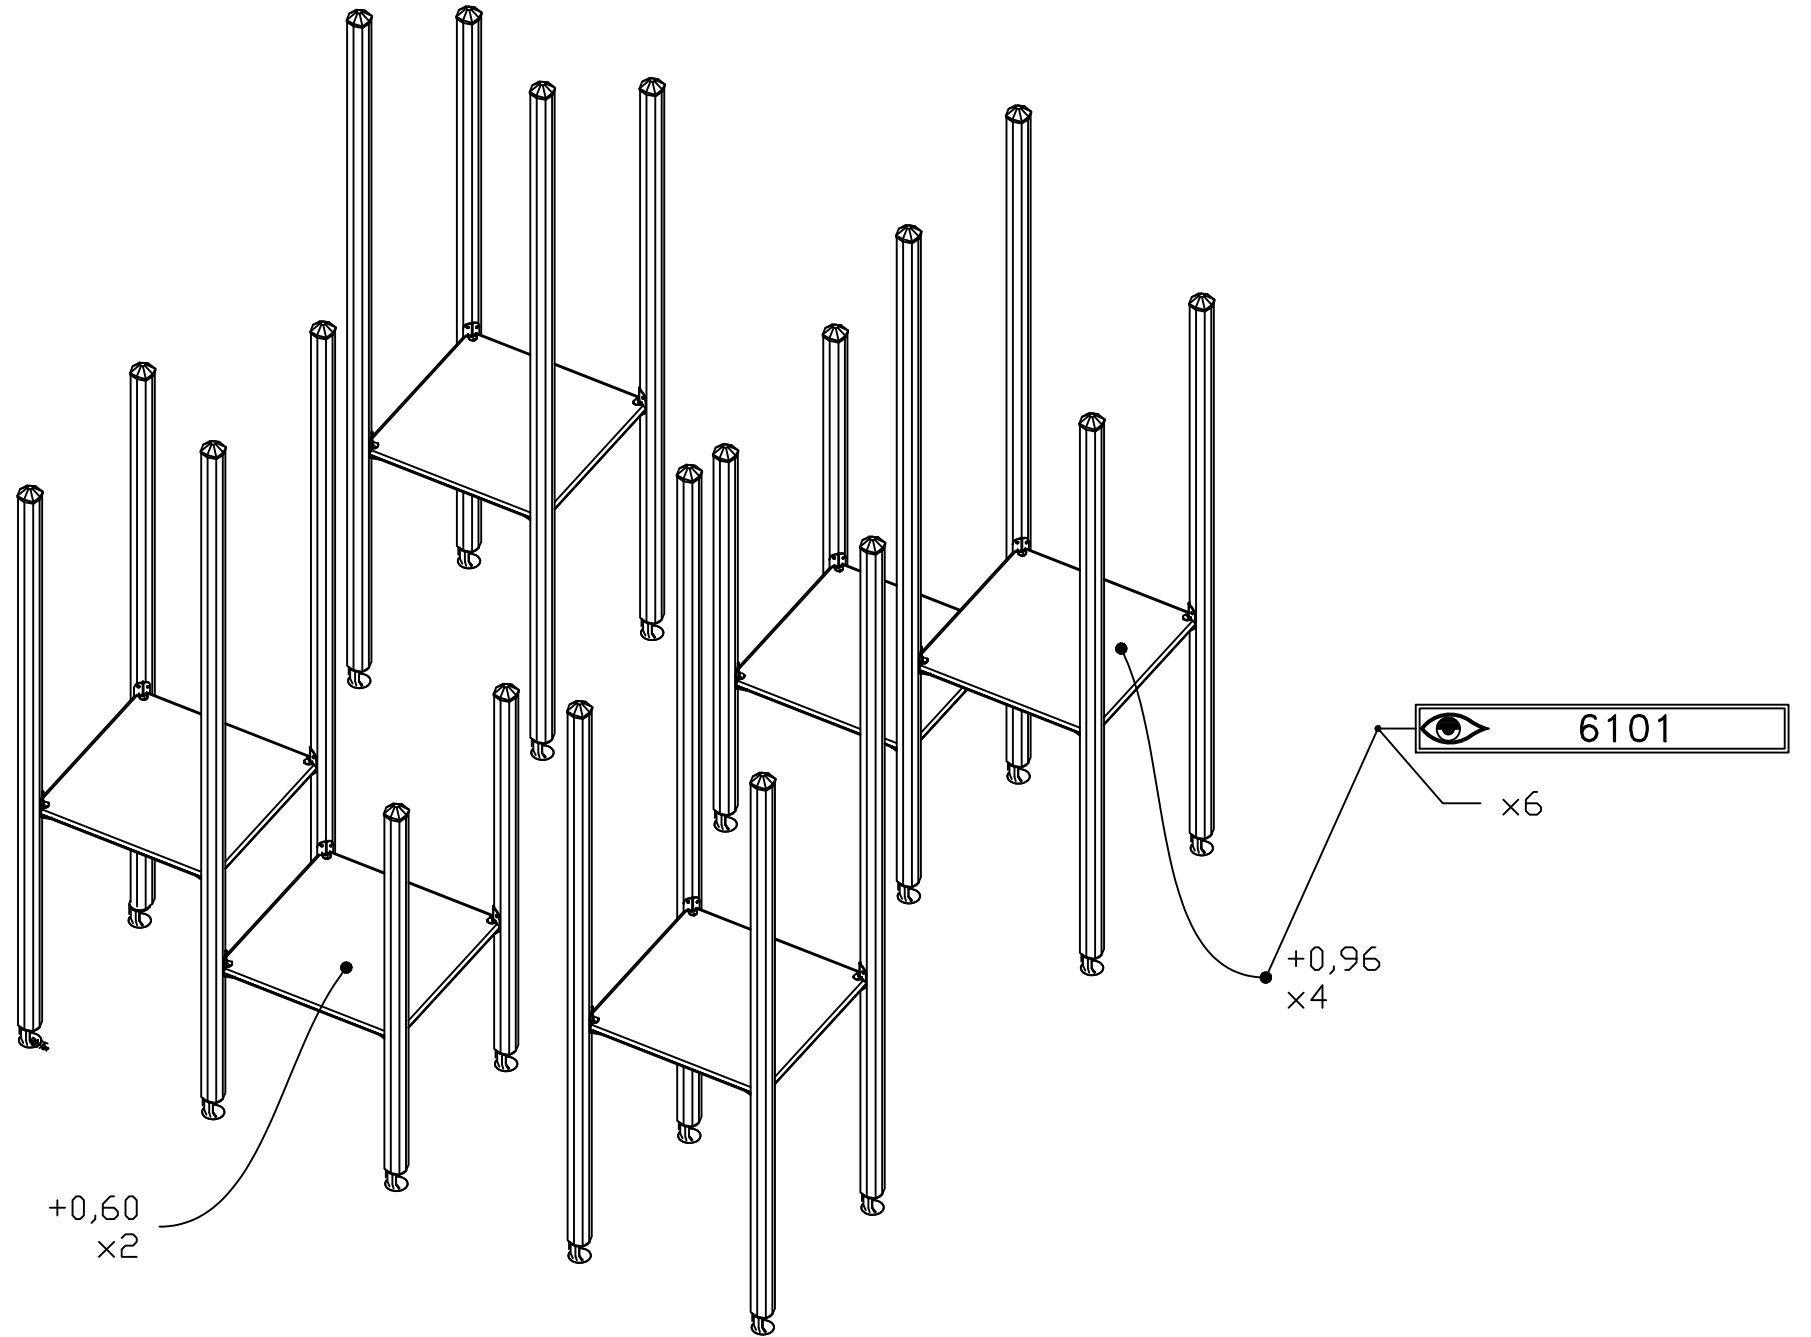

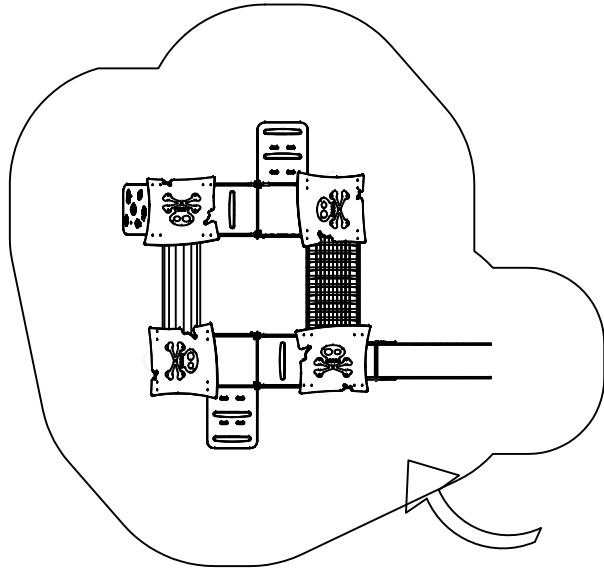

6. Check the safety surfacing. The safety surfacing should be installed according to the technical drawings. The safety surfacing should be checked for stability and drainage.
